

DR REPS / OWNER

Owner / Admin Handover

Operating instructions for the DR Reps dashboard

The screenshot shows the DR Reps dashboard interface with several fields and callouts:

- 1 Select the credited referral code**: Points to the **Seller** dropdown menu.
- 1 Set this deal's commission percentage**: Points to the **Commission %** input field.
- 2 Write the customer's quote terms**: Points to the **Quote for the customer** text area.
- 3 Enter the price for the WHOLE request**: Points to the **Price (EGP)** input field.
- 3 Enter the supplier cost for this request**: Points to the **Supplier cost (EGP)** input field.

The dashboard fields include:

- Status**: Quoted (dropdown)
- Seller**: Ahmed Ha: (dropdown)
- Commission %**: 10
- Quote for the customer**: Lilac knit, size M, unworn
- Price (EGP)**: 2401
- Supplier cost (EGP)**: 1750
- Supplier (internal)**: (empty)

Set attribution, customer terms, total price and supplier cost. · computer · actual UI/sample records

Private owner handover. Use with your production admin access. Screens show the real website with sample records. Example items, names and amounts are not live stock or promised earnings.

Use this guide

Choose a task in the clickable contents. Each numbered box identifies the actual field, button or result for that instruction. Read the enlarged screens in order, then check the scenarios and notes. Routes begin at your DR Reps website address. Computer and phone screens use the same saved accounts and records.

01 Responsibilities and access

OPEN /admin

The owner controls the DR Reps catalog, quotes, customer records, order status and seller payouts. A seller is a referral partner who brings customers to DR Reps.

Example screens use the repository's demo records. Use your production store domain and credentials; no live customer data is included.

Owner login uses the owner password. · computer · actual UI/sample records

1. Open the dashboard. Open your DR Reps website and add /admin to the address. Enter the owner password and click Log in.

Packages, independent shops, referral partners and Help are separate. · computer · actual UI/sample records

2. Use the correct account. The owner password is separate from a customer password and a seller code/password. A seller login does not grant admin access.

3. Navigate. On a computer, use the left sidebar. On a phone, use the bottom navigation; scroll it sideways to reach additional sections.

4. Finish safely. Click Log out when finished on a shared device. Use View store to check the customer experience.

02 Operate the dashboard on a phone

OPEN /admin

The same dashboard adapts to a narrow screen. Cards stack vertically and wide tables can scroll horizontally.

Scrollable owner tabs on a phone. · phone · actual UI/sample records

- 1. Sign in.** Open /admin in your phone browser and enter the owner password.
- 2. Move between sections.** Tap the bottom navigation. Swipe along it for Products, Packages Offers, Marketplace, Referral partners, Commissions, Preview, Settings and Help.
- 3. Inspect records.** Tap a request/customer/product name to open its detail. Scroll down to the Save button; editing a field alone does not save.
- 4. Handle wide data.** Swipe inside a wide table to see columns on the right. Keep the request number in view when comparing payment and delivery.
- 5. Use desktop when convenient.** Bulk Excel entry and comparing many records are easier on a computer. Both devices operate on the same saved store records.

03 Configure contact, payment and commission

OPEN /admin/settings

Set these before accepting orders. All customer communication and fulfillment belongs to DR Reps.

Changing the global commission basis changes calculations on existing won deals too. Reconcile historical payouts before changing Profit to Sale price or back.

WhatsApp number (with country code)

Contact email

Instagram handle
yourfavouriteshoeplug

1 Set the store WhatsApp number

1 Set the store contact email

1 Set the store Instagram handle

Use the live store contact details. · computer · actual UI/sample records

1. Contact. Enter the store WhatsApp number with country code, contact email and Instagram handle.

How customers pay

Pay cash on delivery, or by bank transfer or InstaPay. We confirm your payment on WhatsApp.

2 Write the accepted payment instructions

Payment instructions are stored only when settings are saved. · computer · actual UI/sample records

2. Payment instructions. Under Orders and payment, write the payment methods actually accepted and how customers should confirm payment. Click Save settings.

Save settings

2 Save the store settings

Save settings applies your changes. · computer · actual UI/sample records

2. Payment instructions. Under Orders and payment, write the payment methods actually accepted and how customers should confirm payment. Click Save settings.

The screenshot shows a form with four input fields. The first three fields are grouped by a bracket and labeled with a callout box. The fourth field is labeled with a separate callout box. The callouts are numbered 3 and 4.

- 3 Set the default commission percentage** (points to the 'Default commission %' field)
- 3 Choose Profit or Sale as the basis** (points to the 'Commission is a share of' dropdown)
- 3 Set the store currency** (points to the 'Currency' field)
- 4 Set the customer referral discount** (points to the 'Discount for customers who use a seller code (%)' field)

The form fields are:

- Default commission %**: 10
- Commission is a share of**: Profit (sale minus cost) ▼
- Currency (shown next to amounts)**: EGP
- Discount for customers who use a seller code (%) (0 = the code only credits the seller)**: 5

Set the agreed commission basis/rate, currency and customer discount. · computer · actual UI/sample records

3. Seller terms. Set Default commission %, choose Profit or Sale price, and enter Currency. A seller-specific rate can override the default.

4. Customer discount. Set the discount percentage for seller/referral codes. At 0%, a valid code attributes the order without reducing its price.

5. Check the result. Open an order as a customer and verify the payment instructions, currency and discount message.

04 Edit the home page and FAQ

OPEN /admin/settings

Use Settings for visible store information; the customer walkthrough is available from the home-page FAQ.

Edit Q: and A: lines for your published FAQ. · computer · actual UI/sample records

- 1. Brand.** Edit Store name, Tagline, Home headline, Home intro and the optional Announcement bar.
- 2. Campaign slides.** Upload landscape images, add each small heading/title/link, and save. Empty slots use the site's fallback campaign.
- 3. FAQ text.** Write each question as a Q: line followed by its A: line. Save settings, then open the home page and scroll to FAQ.

Save settings applies your changes. · computer · actual UI/sample records

- 3. FAQ text.** Write each question as a Q: line followed by its A: line. Save settings, then open the home page and scroll to FAQ.
- 4. Customer instructions.** The FAQ includes a Website guide entry linking to the real UI walkthrough and its PDF. Keep factual answers consistent with current store terms.
- 5. Verify devices.** Check the home page on a computer and phone. Confirm every campaign link and the guide download opens correctly.

05 Create and maintain products

OPEN /admin/products

Products are DR Reps catalog listings. They have no public selling price; the price is quoted per request.

A listing does not reserve stock or guarantee a size. Verify supplier availability, condition and quantity when preparing a quote.

Start a new DR Reps catalog product. · computer · actual UI/sample records

1. Create. Open Products and click New product. Add Name, Brand, Category, Condition, Sizes and Description.

Product details and comma-separated sizes. · computer · actual UI/sample records

1. Create. Open Products and click New product. Add Name, Brand, Category, Condition, Sizes and Description.

2. Sizes. Enter sizes separated by commas, for example 40, 41, 42 or S, M, L. Leave empty for products without sizes.

Feature/hide settings and Save changes. · computer · actual UI/sample records

4. Publish or feature. Click Publish product. In an existing record, select Feature on the home page if appropriate, then Save changes.

5. Hide or delete. Hide from the store preserves the product record. Delete product removes it; existing requests retain their saved item details.

Upload actual product photos in the editor. · computer · actual UI/sample records

3. Photos. Upload product photos and wait for processing. Review the result before publishing.

06 Use the product photo tool

OPEN </admin/products/new>

The photo tool works inside the product editor. It keeps the original photo and places its cut-out on a backdrop.

Supported uploads: JPG, PNG, WEBP or GIF. Owner uploads are limited to 15 MB. If processing fails, keep the original or retry a smaller file.

Upload actual product photos in the editor. · computer · actual UI/sample records

1. Upload. Click Drop photos here or click to upload on a computer, or tap it on a phone to choose an image.

Review the saved product cut-out and backdrop controls. · computer · actual UI/sample records

- 2. Wait.** With Auto clean-up on, wait for background removal and upload. Keep the editor open until the status finishes.
- 3. Review.** Inspect edges, colour, logos and product details. Select the original if clean-up is unsuitable; re-clean or change backdrop using the photo controls.
- 4. AI scenes.** In Settings, generate an empty AI scene if a provider is connected. Select the saved scene in the product editor. The product cut-out is placed over it.
- 5. Save.** Processing a photo does not publish the product. Click Publish product or Save changes after reviewing all details.

07 Bulk add products from a spreadsheet

OPEN /admin/products

Bulk add from Excel creates new products from tab-separated rows. It does not update or deduplicate existing products.

Paste actual spreadsheet rows, then Import once. · computer · actual UI/sample records

- 1. Prepare columns.** Use this order: Name, Brand, Category, Condition, Sizes, Description, Image link. Only Name is required.
- 2. Copy.** Select the rows in Excel or Google Sheets and copy them. Keep one product per row and comma-separated sizes in one cell.
- 3. Paste.** Open Products, expand Bulk add from Excel and paste the rows into the box.
- 4. Import.** Click Import once. A header named Name or Product is skipped. Check the imported count and open representative products.
- 5. Avoid duplicates.** Search the catalog before repeating an import. Correct an existing item through its editor rather than importing it again.

08 Create a Packages Offer

OPEN </admin/packages/new>

Packages Offers are independent fixed-price bundles. Their records do not reuse the main Products catalog.

Example prices in these screenshots are sample data. A bundle request records the displayed price and contents at submission; no stock is reserved.

Packages Offers

Separate fixed-price bundles. Updates every 48 hours.

Updates every 48 hours Stock availability is not guaranteed. Confirm availability with DR Reps before purchase.

Package	Price	Availability	Last checked	Published
Outerwear Pack 1 x jacket 1 x knit sweater	2,450 EGP	Confirm stock before purchase	7 Oct 2026	Yes

1 Create a separate package record

1 Open this package record

Owner package list with last checked and published state. · computer · actual UI/sample records

1. **Open the tab.** Open Packages Offers in the owner sidebar or phone navigation, then New package.

Package name

Street Essentials Pack

Fixed price (EGP)

1250

Sizes / options (comma separated)

S, M, L, XL

Included items and quantities

1 x tee
1 x trousers
1 x cap

2 Enter the package name

2 Set the fixed price of ONE package

3 Enter available sizes / options

2 List each included item and quantity

Package records contain their own price, options and included items. · computer · actual UI/sample records

2. **Describe the bundle.** Upload an image, enter a name and positive fixed price in the configured store currency. In Included items and quantities, state exactly what one package contains.

3. **Set options and terms.** Enter comma-separated sizes/options if needed. Explain any mixed-size requirements and delivery terms in Description and terms.

The screenshot shows a web form for saving a package. It includes a dropdown menu for 'Availability report' with 'Confirm stock' selected, a checkbox for 'I checked stock now (refresh last checked)', and a checked checkbox for 'Published'. A purple informational box states: 'Updates every 48 hours. Offers older than 48 hours show Needs stock recheck; saving text alone does not claim stock was rechecked.' At the bottom is a large black 'Save package' button. Four callout boxes with purple borders and the number '4' point to these elements:

- 4 Set the latest availability report** (points to the 'Availability report' dropdown)
- 4 Record that you checked stock now** (points to the 'I checked stock now' checkbox)
- 4 Publish or hide this package** (points to the 'Published' checkbox)
- 4 Save the package record** (points to the 'Save package' button)

Explicitly record a stock check; hide/block an unavailable package. · computer · actual UI/sample records

4. Publish. Choose an Availability report. Keep Published checked to list it on the home page and /packages. Click Save package.

5. Verify. Open the customer offer on phone and computer. Check the included quantities, one-package price, options and stock notice.

09 Recheck packages every 48 hours

OPEN /admin/packages

Every public offer displays Updates every 48 hours and explains that stock is not guaranteed. The owner must carry out the actual review.

The notice is a review policy, not an automated stock feed or a stock guarantee. Even Reported available requires confirmation for the customer’s request.

Packages Offers

Separate fixed-price bundles. Updates every 48 hours.

Updates every 48 hours Stock availability is not guaranteed. Confirm availability with DR Reps before purchase.

Package	Price	Availability	Last checked	Published
Outerwear Pack 1 x jacket 1 x knit sweater	2,450 EGP	Confirm stock before purchase	7 Oct 2026	Yes

1 Create a separate package record

1 Open this package record

Owner package list with last checked and published state. · computer · actual UI/sample records

1. Check suppliers. At least every 48 hours, confirm the actual bundle items, sizes, quantities and current price with the supplier.

The form contains the following elements:

- Availability report**: A dropdown menu currently showing "Confirm stock".
- I checked stock now (refresh last checked)**: A checkbox that is currently unchecked.
- Published**: A checkbox that is currently checked.
- Save package**: A large black button at the bottom.
- Informational text**: A light purple box stating "Updates every 48 hours. Offers older than 48 hours show Needs stock recheck; saving text alone does not claim stock was rechecked."

Numbered callouts point to specific parts of the form:

- 2 Set the latest availability report**: Points to the "Availability report" dropdown.
- 2 Record that you checked stock now**: Points to the "I checked stock now" checkbox.
- 4 Publish or hide this package**: Points to the "Published" checkbox.
- 3 Save the package record**: Points to the "Save package" button.

Explicitly record a stock check; hide/block an unavailable package. · computer · actual UI/sample records

2. Update intentionally. Open the package, correct its contents/price/options, choose the latest Availability report and check I checked stock now.

3. Save. Click Save package. The checkbox refreshes Last checked. Editing text without it keeps the previous stock-check time.

4. Unavailable or withdrawn. Choose Unavailable to block new stock requests while retaining the listing, or clear Published to remove it from the customer site.

5. Review stale offers. After 48 hours without a recorded check, the offer shows Needs stock recheck. Recheck it before accepting payment.

10 Fulfill a package request

[OPEN /admin/requests](#)

Package requests join the normal owner queue and the customer’s My orders. They start with the bundle amount and no price-unlock code.

A package can be referred by a partner and use the configured discount. Marketplace shop enquiries are separate and do not enter this request/commission lifecycle.

Package: Street Essentials Pack

3

Check the whole-request price

Actual saved package request: its contents and two-package total. · computer · actual UI/sample records

1. **Inspect the snapshot.** Open the request. Check Package: name, quantities, chosen option, included-item note and customer’s city/notes.
2. **Confirm stock and charges.** Check every included item and quantity. Confirm delivery charges and any requested mixed sizes with the customer before accepting money.
3. **Finalize the quote.** Enter the final whole-request Price before discount, supplier cost and clear quote terms. Click Save to generate the price code.

The screenshot shows a quote management interface. At the top, a summary box displays financial details: 'Customer pays 2,280.95 EGP', 'Profit 530.95 EGP', 'Seller commission 53.09 EGP', and 'You keep 477.85 EGP'. To the right of this box, a callout bubble with a purple border and a purple circle containing the number '3' contains the text 'Check the calculated totals / commission'. Below the summary box, there are two dropdown menus: 'Payment' with the value 'Not paid' and 'Delivery' with the value 'Not shipped yet'. Below these is a checkbox labeled 'Commission paid to the seller'. Underneath is a section titled 'Add a note (internal, goes to the timeline)' with a text input field containing 'Called supplier, waiting for stock photo...'. At the bottom, there are two buttons: a black 'Save' button and a white 'Send quote on WhatsApp' button. A callout bubble with a purple border and a purple circle containing the number '3' points to the 'Save' button, containing the text 'Save the quote and deal changes'.

Customer pays **2,280.95 EGP** Profit **530.95 EGP**
Seller commission **53.09 EGP**
You keep **477.85 EGP**

3 Check the calculated totals / commission

Payment Delivery

Add a note (internal, goes to the timeline)
Called supplier, waiting for stock photo...

3 Save the quote and deal changes

Save Send quote on WhatsApp

Review calculated amounts and save the quote. · computer · actual UI/sample records

3. Finalize the quote. Enter the final whole-request Price before discount, supplier cost and clear quote terms. Click Save to generate the price code.

Price code Unlocked 2m ago

25K-BB8

The customer enters this code on their order page to see the price. Change the price and a new code is made.

Send code on WhatsApp

Copy message

4 Read this order's price-unlock code

4 Open its prepared code message

4 Copy the code and order message

Price	Discount code
2,401 EGP	AHMED01 · 5%
Customer pays	Payment
2,280.95 EGP	Not paid
Delivery	
Not shipped yet	

Send the matching order's latest price code. · computer · actual UI/sample records

4. Send and follow. Send the current code through WhatsApp. Follow customer unlocking, any valid referral discount, payment and delivery using the ordinary order process.

5. If stock fails. Agree an alternative or mark Lost. Editing today's package does not rewrite an earlier request's saved item/offer snapshot.

11 Enable or disable Sellers and Distributors

OPEN /admin/marketplace

Both marketplace sections start off on production. The admin tab and saved records remain available so you can prepare listings for a future launch.

Marketplace listings are separate from DR Reps clothing/catalog items, Packages Offers and hidden referral partners. Neither switch creates a merchant login, shared checkout or payment split.

Use these independent switches when you are ready to launch. · computer · actual UI/sample records

1. Open Marketplace. Use Marketplace in the owner sidebar or phone tabs.

2. Choose Sellers. Check Enable Marketplace Sellers to display independent retail businesses and their own products.

3. Choose Distributors. Check Enable Distributors to display independent distributors in any product category. It does not depend on the Sellers switch.

4. Save visibility. Click Save visibility. Enabled sections show their customer menu, home section, public pages and application option.

After saving both off: records remain in admin; customer sections disappear. · computer · actual UI/sample records

5. Disable later. Clear either switch and save to hide that type from customers. Its records remain editable in admin. Pausing one business hides only that business.

12 Approve and manage marketplace shops

OPEN </admin/marketplace>

Marketplace Sellers and Distributors are independent businesses in any product category, with their own pages and products. They are separate from Referral partners.

This version lists stores and supports direct contact with them. It does not create merchant logins, merchant checkout, marketplace payment splitting or referral commission on direct shop sales.

+ Add business

Marketplace visibility

Keep these off until you are ready. Disabling a section hides its customer links, listings and applications; saved records stay in the admin panel.

☒ Enable Marketplace Sellers

Only published shops are publicly listed. · computer · actual UI/sample records

- 3. Publish.** Set Publication status to published and click Save shop. The business appears in its enabled customer section and on the home page. If its section is disabled, it stays private even when marked published.

The form consists of the following elements:

- Product name**: A text input field with a callout box stating: "4 Enter this business's item name".
- Price (optional; store currency)**: A text input field with a callout box stating: "4 Set an optional listing price".
- Sizes**: A text input field with a callout box stating: "4 Enter the item's sizes / options".
- Description**: A larger text input field with a callout box stating: "4 Add the item to THIS business".
- Visible product**: A checkbox that is currently checked, with a callout box stating: "4 Add the item to THIS business".
- Add product**: A dark button at the bottom of the form.

Add a merchant's own product to that shop, outside DR Reps catalog. · computer · actual UI/sample records

4. Add their products. After saving the shop, use Add shop product. Enter name, optional price, sizes, description and image; keep Visible product checked and save.

5. Update or pause. Use Save product for edits or clear Visible product. Set the shop to paused/rejected/pending to hide its entire public page. Test View public shop after changes.

13 Create a seller / referral partner

OPEN /admin/sellers/new

Create a private seller account so the partner can share links and track commission. Customers continue shopping with DR Reps.

The partner has no product ownership, supplier control, pricing permission, payment authority or fulfillment role in this website.

The form is titled 'Create seller / referral partner' and contains the following fields and annotations:

- Seller code** (leave empty to generate): E.G. AHMED01. Annotation 2: Choose a unique referral code.
- Profile picture**: A placeholder with a question mark and an 'Upload photo' button. Annotation 1: Enter the referral partner name.
- Name**: A text input field. Annotation 1: Enter the partner contact phone.
- WhatsApp / phone**: A text input field with the example '+20 100 123 4567'.
- Email** (for request alerts): A text input field.
- Commission %** (empty = default 10%): A text input field. Annotation 3: Set their agreed commission percentage.
- City / area**: A text input field.
- Private bio**: A text area.
- Active** (can log in, link credits requests): A checked checkbox. Annotation 3: Create the private partner login.
- Create seller**: A button at the bottom.

Create the hidden referral partner with code and agreed rate. · computer · actual UI/sample records

- 1. Add the partner.** Open Referral partners and click New seller. Enter name, phone, optional email and city.
- 2. Choose a code.** Enter a unique code such as AHMED01, or leave it blank to generate one. Codes accept letters, numbers and hyphens.
- 3. Set terms.** Set Commission % or leave it blank for the default. Keep Active selected and click Create seller.

5 DR Reps branding remains visible

5 Customers enter the DR Reps shop

After opening the referral: only DR Reps branding and its shop appear. · computer · actual UI/sample records

5. Check the referral. Open the customer link: it should open the DR Reps shop with no personal seller storefront. Use Preview to check the partner's private panel.

14 Pause, reset or remove a seller

OPEN </admin/sellers/1>

Open Referral partners, then click the partner's name. The code is fixed after creation.

Do not reuse a deleted code for a different person: old requests and saved customer referrals still carry that code.

Save edits, pause access or issue a replacement password. · computer · actual UI/sample records

- 1. Edit.** Change contact details, private bio, commission rate or Active, then Save changes.
- 2. Pause.** Clear Active and save. The partner cannot sign in and new referral links/codes are no longer accepted as active.
- 3. Reset access.** Click New password. Copy the one-time password and deliver it securely. The old password and old sessions stop working.
- 4. Review existing orders.** Pausing does not erase past requests or automatically clear saved customer referrals. Inspect existing attribution and amounts explicitly.
- 5. Delete only when intended.** Delete seller removes the login record. Past requests keep its code. Settle/reconcile owed commission before deletion.

15 Review the request pipeline

[OPEN /admin/requests](#)

ample supplier

3 Choose the current request stage

3 Record the internal supplier

Set Searching and record the internal supplier. · computer · actual UI/sample records

2. Open the record. Click a request number/name. Review items, size, quantity, customer notes and source.

3. Start sourcing. Choose Searching, enter supplier information and add an internal note. Click Save.

Write the internal timeline note, then save it. · computer · actual UI/sample records

4. Keep the timeline current. Record calls, alternatives and promised dates in Add a note. These notes belong to the internal timeline. Click Save to record the note.

5. Close correctly. Quoted means a quote exists; Won means the deal is counted as successful; Lost means it will not proceed. Payment and delivery are separate fields.

16 Set the quote and price

OPEN /admin/requests/8

Enter the total quoted selling price for this request, not a catalog price or an unlabelled per-piece price.

For profit-based commission, a missing supplier cost is treated as zero in the calculation. Enter the real cost before closing a deal.

The form contains the following fields and sections:

- Status:** A dropdown menu with 'Quoted' selected.
- Seller:** A dropdown menu with 'Ahmed Ha:' selected.
- Commission %:** A text input field containing '10'.
- Quote for the customer:** A large text area containing 'Lilac knit, size M, unworn'.
- Price (EGP):** A text input field containing '2401'.
- Supplier cost (EGP):** A text input field containing '1750'.
- Supplier (internal):** An empty text input field.

Numbered callouts point to the following fields:

- 1 Select the credited referral code** (points to Seller)
- 1 Set this deal's commission percentage** (points to Commission %)
- 2 Write the customer's quote terms** (points to Quote for the customer)
- 3 Enter the price for the WHOLE request** (points to Price (EGP))
- 3 Enter the supplier cost for this request** (points to Supplier cost (EGP))

Set attribution, customer terms, total price and supplier cost. · computer · actual UI/sample records

1. Check attribution. Review Seller. Keep the correct referral code or select No seller. Set Commission % if this deal has a special agreed rate.

2. Write the quote. Describe the agreed items, sizes, quantities, condition, delivery timing and any included charges in Quote for the customer.

3. Enter amounts. Enter Price before discount and Supplier cost. Use the same currency and whole-order basis for both.

The screenshot shows a quote management interface. At the top, a summary box displays financial details: 'Customer pays 2,280.95 EGP', 'Profit 530.95 EGP', 'Seller commission 53.09 EGP', and 'You keep 477.85 EGP'. To the right, a callout box labeled '4' instructs the user to 'Check the calculated totals / commission'. Below this, there are dropdown menus for 'Payment' (set to 'Not paid') and 'Delivery' (set to 'Not shipped yet'). A checkbox for 'Commission paid to the seller' is present and unchecked. An 'Add a note' section contains the text 'Called supplier, waiting for stock photo...'. At the bottom, there are two buttons: 'Save' and 'Send quote on WhatsApp'. A callout box labeled '5' points to the 'Save' button, instructing the user to 'Save the quote and deal changes'.

Customer pays **2,280.95 EGP** Profit **530.95 EGP**
Seller commission **53.09 EGP**
You keep **477.85 EGP**

4 Check the calculated totals / commission

Payment Delivery
Not paid Not shipped yet

☐ Commission paid to the seller

Add a note (internal, goes to the timeline)
Called supplier, waiting for stock photo...

5 Save the quote and deal changes

Save Send quote on WhatsApp

Review calculated amounts and save the quote. · computer · actual UI/sample records

4. Check the calculation. Read Customer pays, Profit, Seller commission and You keep. Discounts reduce the customer amount before commission is calculated.

5. Save. Click Save. A new price code is created when the price is first entered, and New/Searching normally moves to Quoted.

17 Send a price code and handle repricing

OPEN </admin/requests/8>

The price code unlocks one order's price. It is separate from a seller/referral discount code.

Saving a price or opening WhatsApp does not prove the customer received a message. Send it and confirm the correct order link.

The screenshot shows a 'Price code' card. At the top, it says 'Price code' and 'Unlocked 2m ago'. Below this is a large black box with the code '25K-BB8'. A callout box with a purple border and a purple circle containing the number '1' points to this code box, containing the text '1 Read this order's price-unlock code'. Below the code box, there is a paragraph: 'The customer enters this code on their order page to see the price. Change the price and a new code is made.' Below this paragraph are two buttons: 'Send code on WhatsApp' and 'Copy message'. A callout box with a purple border and a purple circle containing the number '2' points to the 'Send code on WhatsApp' button, containing the text '2 Open its prepared code message'. Another callout box with a purple border and a purple circle containing the number '2' points to the 'Copy message' button, containing the text '2 Copy the code and order message'. Below the buttons, there is a table with order details:

Price	Discount code
2,401 EGP	AHMED01 · 5%
Customer pays	Payment
2,280.95 EGP	Not paid
Delivery	
Not shipped yet	

Send the matching order's latest price code. · computer · actual UI/sample records

- 1. Find the code.** After saving a price, use the Price code card. Click Send code on WhatsApp or Copy message.
- 2. Send the message.** WhatsApp opens a prepared message. Review the recipient, request number and code, then press Send.
- 3. Check unlocking.** The card shows whether the customer has unlocked the quote. A wrong or outdated code is rejected.
- 4. Reprice before payment.** Before the order is marked Paid, change Price and Save. A new code replaces the old one and the customer must unlock the updated price again.
- 5. Explain the change.** Send the new code and clarify the revised terms. Existing discount percentage remains on the request, so verify the new customer total.

18 Confirm payment and update delivery

OPEN /admin/requests/7

Payment records customer money. Commission paid records money paid to the referral partner. They are different controls.

There is no built-in payment gateway or courier tracking integration. The owner verifies payment and records delivery updates manually.

Payment

Not paid

Delivery

Not shipped yet

☐ Commission paid to the seller

Add a note (internal, goes to the timeline)

Called supplier, waiting for stock photo...

Save

Send quote on WhatsApp

- 1 Record verified customer payment
- 3 Update the actual delivery stage
- 4 Record commission paid to the partner
- 1 Save the order updates

Customer payment, delivery and partner payout are distinct fields. · computer · actual UI/sample records

- 1. Confirm receipt.** After verifying the agreed payment with the customer, set Payment to Paid and Save.
- 2. Check status.** Marking Paid moves the request to Won. Review the commission rate and amounts before saving; correct a mistaken payment status explicitly.
- 3. Track fulfillment.** Set Delivery to Preparing, then On the way, then Delivered as those events actually happen. Save each update.
- 4. Use separate payout control.** Leave Commission paid to the seller unchecked until the partner has actually been paid.
- 5. Keep customer informed.** Customers see Payment and Delivery on their order page. Send tracking details or delivery changes through the store's contact channel.

19 Maintain customers and reset their access

OPEN /admin/customers

CRM records are matched by the full WhatsApp number including country code. An Account badge indicates a customer login exists.

Seller-created requests appear in CRM but do not automatically appear in the customer's My orders account. A seller-entered enquiry cannot change an existing account's profile or saved referral.

The screenshot shows the 'Customers' page with the following elements:

- Header:** 'Customers' title and subtitle 'Everyone who has sent a request, matched by phone number.'
- Search Bar:** A text input field labeled 'Name, phone, email or city' with a 'Tag' dropdown and a 'Search' button.
- Table:** A table with columns: Customer, Seller, Requests, Won, Spent, Last seen. The first row shows 'Sara Ahmed' with an 'Account' badge, phone number '201990000010', city 'Cairo', seller 'Ahmed Hassan', 4 requests, 1 won, 9,310 EGP spent, and '2m ago' last seen.
- Export CSV:** A button with a download icon and the text 'Export CSV'.

Numbered callouts point to the following features:

- 1 Search the customer records**: Points to the search bar.
- 2 Open this customer's history**: Points to the 'Sara Ahmed' customer entry in the table.
- 5 Export customer records as CSV**: Points to the 'Export CSV' button.

Search the CRM, open the customer, or export CSV. · computer · actual UI/sample records

- 1. Find the customer.** Open Customers. Search by name, phone, email or city, or filter by a tag.
- 2. Review history.** Open the name to see requests, spend and saved Seller/referral. Check the specific request as well as the customer-level referral.
- 5. Export.** Use Export CSV from Customers when a spreadsheet is needed. Store the file privately because it includes customer contact information.

3 Edit the customer name

3 Edit the customer email

3 Enter comma-separated CRM tags

3 Review the saved referral code

3 Save the customer record

Maintain the customer record and saved referral. · computer · actual UI/sample records

3. Edit details. Update name, email, city, comma-separated tags, private notes or the saved seller, then Save. Phone is read-only in this screen.

🔑 New password

4 Generate a new customer password

Only reset access after verifying the customer. · computer · actual UI/sample records

4. Reset an account password. Use New password for an account holder. The generated password is shown once; deliver it to the verified customer. Resetting signs out their sessions.

20 Understand commission calculations

OPEN /admin/commissions

Commission is counted on requests marked Won with Payment = Paid, a sale price and a stored commission rate.

The example is arithmetic only. Rates, currency and payout timing depend on the owner's configured terms. Negative profit produces zero commission.

- 1. Customer total.** $\text{Quoted price} \times (100 - \text{discount \%}) \div 100$.
- 2. Profit basis.** $\text{Commission} = \max(0, \text{customer total} - \text{supplier cost}) \times \text{commission \%}$.
- 3. Sale basis.** $\text{Commission} = \text{customer total} \times \text{commission \%}$. Supplier cost does not change this basis.
- 4. Rate order.** A rate entered for the deal takes priority. When a deal becomes Won without a rate, the app uses the seller rate or default and stores it on the request.
- 5. Example.** Price 1,000; discount 5%; cost 600; rate 10% of profit. Customer pays 950; profit is 350; seller earns 35; store keeps 315 after cost and commission.

21 Pay commission and correct payout marks

OPEN /admin/commissions

The dashboard records payout status; it does not transfer money to a seller.

Paid to you uses the recorded payout amount, which stays fixed when a deal is later refunded. The flags are not bank confirmations; reconcile actual transfers separately.

The screenshot shows the 'Commissions' dashboard with two tabs: 'Unpaid' and 'All won deals'. The 'Unpaid' tab is selected. Below the tabs is a table with columns: Deal, Seller, Sale, Profit, Rate, and Commission. Two deals are listed: '#1 Omar Ali' and '#3 Nour Khaled'. To the right of the table, there are two buttons: 'Mark paid' and 'Undo paid'. Numbered callouts explain the workflow: 1. Choose Unpaid or All won deals (points to the tabs), 3. Mark this commission as actually paid (points to the 'Mark paid' button), and 5. Undo an incorrect payout mark (points to the 'Undo paid' button).

Deal	Seller	Sale	Profit	Rate	Commission
#1 Omar Ali 7 Oct 2026	Ahmed Hassan	17,575 EGP -5%	3,375 EGP	10%	337.5 EGP
#3 Nour Khaled 7 Oct 2026	Mona Adel	24,000 EGP	4,500 EGP	12%	540 EGP

Reconcile before marking or undoing a partner payout. · computer · actual UI/sample records

- 1. Review owed amounts.** Open Commissions. Unpaid shows eligible paid, won deals awaiting payout; All won deals also shows paid entries.
- 2. Reconcile.** Check each deal's discounted sale, cost, basis, rate and commission against the agreed terms.
- 3. Pay outside the app.** Use the agreed payment method and retain proof. Only then click Mark paid on the corresponding deal.
- 4. Settle a whole partner.** Mark all paid marks all currently unpaid eligible requests for that partner. Review the group before confirming.
- 5. Correct a mistaken mark.** Under All won deals, click Undo paid for the affected deal. This changes the record only; it does not reverse a real transfer. For a refunded deal, open its request from the reconciliation notice.

22 Unavailable, cancellation, refund and corrections

[OPEN /admin/requests](#)

These cases need explicit owner handling; the app does not automate returns or financial reversals.

Scenarios and next steps

Situation	What to do
Unavailable item / declined quote	Agree alternatives with the customer, add an internal note and mark Lost if the request will not proceed.
Customer changes item, size or quantity	Confirm the amendment in the quote/note. There is no customer self-edit of a submitted order; a new request is often clearest.
Refund after payment	Record Payment = Refunded, explain the amount and method in notes, and perform the refund outside the app.
Refunded deal and commission	Marking Refunded moves the request to Refunded and removes it from earned and owed commission. If a partner payout was marked paid, Commissions flags it for reconciliation; review the actual transfer and then update the request payout flag.
Partial refund / partial delivery	There are no dedicated partial-refund or partial-shipment fields. Keep agreed amounts and fulfillment details in notes; reconcile manually.
Mistaken Won or Paid	Correct Payment deliberately and save. Changing Paid back to Not paid removes Won status. If a seller payout was marked paid, clear that record first before changing attribution, cost or rate; reconcile any actual transfer separately.

23 Referral and attribution scenarios

[OPEN /admin/requests](#)

Attribution belongs to an order. The customer's saved referral is a fallback for future requests.

Scenarios and next steps

Situation	What to do
Customer opens /s/CODE	Active code sets a 30-day browser referral cookie, then redirects to the DR Reps shop without a public seller identity.
Customer opens product?ref=CODE	An active code is recorded silently while the customer remains on the DR Reps product page.
Returning customer / cookie expired	The saved customer referral can still be used when there is no new valid code.
Another valid code is supplied	The new valid code can credit that order. The first saved customer referral remains unless the owner explicitly changes the customer record.
Discount code is applied	The active code replaces that order's referral and applies the configured discount after unlocking and before payment.
Inactive/deleted/invalid code	New link/coupon validation requires an active seller. Old saved referrals and historical records are not automatically erased; review exceptions manually.

24 Owner troubleshooting

OPEN /admin/settings

Scenarios and next steps

Situation	What to do
Cannot log in	Check the owner password; repeated wrong attempts trigger a 15-minute wait. Missing login configuration requires the maintainer to set the secrets.
Request exists but WhatsApp was not sent	Ask the customer to use Open WhatsApp again on the order page. Do not create another request just to resend the message.
Price code fails	Check the request number and latest saved code. Eight code attempts in an hour trigger a wait; send the current code.
Email does not arrive	Check Settings → Connections, email address and request timeline. Use Send test email. Credentials/Zoho setup are maintained separately.
Photo upload fails	Check format and size, retry a smaller file, review R2/AI connection status, or keep the original photo.
Totals change unexpectedly	Inspect discount, supplier cost, deal rate, Status, Payment and global commission basis. Seller totals use all attributed requests; the visible request list shows the latest 200, and the commission list is capped at 1,000 deals.

25 Daily handover checklist

[OPEN /admin/help](#)

Use this sequence at the beginning and end of each operating day.

Deployment, database/media backup and secret maintenance are described in the private repository SETUP.md. This guide covers operating the website; it does not certify a production deployment.

- 1. Open work.** Review New, Searching and Quoted requests. Confirm who is waiting for a price or a reply.
- 2. Update promises.** Record sourcing progress, quote changes and delivery timing in the appropriate request.
- 3. Reconcile money.** Verify customer payments separately from seller payouts. Record refunds and corrections explicitly.
- 4. Verify the store.** Check the customer FAQ guide, seller Help and admin Help. Test the links and review any changed products or settings.
- 5. Hand over.** Give the next admin outstanding request numbers, promises, unresolved refunds and payout proof. Provide the correct store domain and owner access securely.
